All his life, Guntur had dreamt about travelling abroad. One day his school announced a competition for scholarship to study in Singapore. As he really wished to go abroad, he followed the competition. He prepared well for the competition because he didn't want to miss the chance. He won the competition and could go abroad, studying in Singapore.

Guntur was pleased when he heard about his winning the scholarship. He was going to study in Singapore. He actually felt cheerless when he had to say goodbye to his family and friends. However, he was excited about going to the university and meet people from all over the world.

The first few weeks in Singapore was not easy for Guntur. Sometimes, he felt homesick and lonely. The other students were nice, but he found it hard to get along with people from the countries with different backgrounds, cultures, and languages. He tried his best to adjust to the new environment. The classes were interesting, but they were hard. He had to spend many hours in the library every day. Guntur didn't want to give up. He knew he had to do his best and succeed.

Big Ben is the bell that strikes the hours in the clock tower above the Houses of Parliament at Westminster in London. It weighs 13.5 tons and was named Big Ben in honour of Sir Benjamin Hall, who was Commissioner of Works at the time of the tower's completion in 1858. Interestingly, the White chapel Bell Foundry where it was cast is still operating from the same location today. There are four smaller bells in the tower which strike the quarters and are called 'Little Bens'.

Big Ben symbolizes to many people the 'Mother of Parliaments'. The British have long period themselves on their democratic tradition. The English Parliament was united with the Scottish Parliament in 1707 and with the Irish between 1801 and 1922. Since 1688 it has been customary for the king or queen to choose his or her ministers from the dominant political party in the Commons.

The Houses of Parliament are not particularly old – the present building having been built between 1840 and 1860. It does, however, incorporate portions of the medieval Palace of Westminster. The Commons debating chamber – which nowadays can be seen on television – was destroyed by incendiary during World War II and was later rebuilt preserving its former character. When the Houses of Parliament are in session, the clock is illuminated at night by a light that goes off only when the House rises.

17. What is the writer's purpose of writing the text?
- A. To describe the clock tower of the Houses of Parliament.
  - B. To promote the Houses of Parliaments at Westminster.
  - C. To make the readers know about the clock tower.
  - D. To introduce the Big Ben in London.

**True Wealth**

Once upon a time, there lived a very rich and wealthy man in a big town. He led a luxurious life. He always boasted about his wealth to his friends and relatives.

His son was studying in a distant city and he returned home for vacation. The rich man wanted to show off to his son how rich he was. But his son wasn't fond of any luxurious lifestyle. However, the rich man wanted to make his son realize that his lifestyle was extremely luxurious and that poor people suffered a lot. He planned a day's visit to the entire town to show him the life of the poor people.

The father and the son took a chariot and visited the entire town. They returned home after two days. The father was happy that his son was very quiet after seeing the poor people honouring the rich man and after witnessing the sufferings of the poor due to lack of facilities.

The rich man asked his son, "Dear boy, how was the trip? Have you enjoyed it?"

"Yes my dad, it was a great trip with you," the son replied.

"So, what did you learn from the trip?" the father asked.

The son was silent.

"Finally you have realized how the poor suffer and how they actually live," said the father.

"No father," replied the son. He added, "We have only two dogs, they have 10 dogs. We have a big pool in our garden, but they have a massive bay without any end! We have luxurious and expensive lights imported from various countries, but they have countless stars lighting their nights. We have a house on a small piece of land, but they have abundant fields that go beyond the horizon. We are protected by huge and strong walls around our property, but they bond with each other and surround themselves with their fellow beings. We have to buy food from them, but they are so rich that they can cultivate their own food."

The rich father was stunned and speechless, on hearing his son's words.

Finally the son added, "Dad, thank you so much for showing me who is rich and who is poor. Thank you for letting me understand how poor we really are!"

28. The text tells us about ... .

We have luxurious and expensive lights imported from various countries, but they have countless stars lighting their nights. We have a house on a small piece of land, but they have abundant fields that go beyond the horizon. We are protected by huge and strong walls around our property, but they bond with each other and surround themselves with their fellow beings. We have to buy food from them, but they are so rich that they can cultivate their own food."

The rich father was stunned and speechless, on hearing his son's words.

Finally the son added, "Dad, thank you so much for showing me who is rich and who is poor. Thank you for letting me understand how poor we really are!"

29. What is the main idea of the third paragraph?

- A. The poor got a help from the rich.
- B. The son planned to visit the poor people.
- C. The poor realized the lifestyle and richness.
- D. The father and the son travelled to the entire town.

### **True Wealth**

Once upon a time, there lived a very rich and wealthy man in a big town. He led a luxurious life. He always boasted about his wealth to his friends and relatives.

His son was studying in a distant city and he returned home for vacation. The rich man wanted to show off to his son how rich he was. But his son wasn't fond of any luxurious lifestyle. However, the rich man wanted to make his son realize that his lifestyle was extremely luxurious and that poor people suffered a lot. He planned a day's visit to the entire town to show him the life of the poor people.

The father and the son took a chariot and visited the entire town. They returned home after two days. The father was happy that his son was very quiet after seeing the poor people honouring the rich man and after witnessing the sufferings of the poor due to lack of facilities.

The rich man asked his son, "Dear boy, how was the trip? Have you enjoyed it?"

"Yes my dad, it was a great trip with you," the son replied.

"So, what did you learn from the trip?" the father asked.

The son was silent.

"Finally you have realized how the poor suffer and how they actually live," said the father.

"No father," replied the son. He added, "We have only two dogs, they have 10 dogs. We have a big pool in our garden, but they have a massive bay without any end! We have luxurious and expensive lights imported from various countries, but they have countless stars lighting their nights. We have a house on a small piece of land, but they have abundant fields that go beyond the horizon. 30. What would probably happen if the son did not explain to his father about the richness?
- A. The father would help the poor.
  - B. The poor would not get a help from his father.
  - C. His father would keep on boasting his richness.
  - D. His father changed his mind into the generous man.

It was a beautiful day. Everybody in the Kawar village was happy. The farmers had just had their best harvest. The villagers were planning to hold a party to celebrate the good harvest. On one beautiful day, all the villagers gathered in a field. They wore beautiful dresses and made delicious food. Everybody was having good times! They were singing, laughing and, of course, eating delicious food.

Did everyone go to the party? Unfortunately, there was one old woman still staying at her house. She was too old and weak to go to the party. Her son, her daughter-in-law, and her grandchildren all went to the party. At home, the old woman felt very sad and lonely. She was very hungry too. She tried to find some food in the kitchen, but she was very disappointed. Her daughter-in-law did not cook that day. At the party, the son asked her wife, "Why don't you take some food from the party and give it to my mom? Ask our son to deliver it." Then the little boy brought the food to her grandmother. The old woman was so happy. But her happiness turned into sadness when she saw the food was not in a good condition. It seemed that someone had eaten the food. She just got little rice and fish bones.

The old woman was very sad. The old woman did not know that it was her grandson who had eaten the food on the way from the party to the house. She cursed her son. Then, a terrible thing happened. There was a great earthquake! Thunders struck the village. And heavy rains started to fall. All the villagers were so scared. They wanted to save themselves. They tried to find shelters. Slowly, the field turned into a lake. The lake was getting bigger and bigger, and finally the whole village turned into a big lake. People then named the lake Lau Kawar.

### **How to Install a Six Volt Battery in a Flashlight**

A flashlight is one of the first things we look for when there is a power failure. However, a dead battery makes the flashlight useless, and fumbling around in the dark is not the best way to replace a battery. Flashlights that hold a 6-volt battery are larger than ones you can grip with one hand and they have handles for easy carrying. Be prepared before the lights go out with a flashlight you can depend on.

Don't be left in the dark with a dead battery.

#### **Step 1**

Remove the cover protecting the lens of the 6V flashlight. The cover will either screw off or is held by clips. Push up on the end of the clip to release the cover.

#### **Step 2**

Unscrew the head that holds the lens. The head contains the glass, the light bulb and wires. The wires will still be connected to the tube of the flashlight, so allow the head to hang to one side.

#### **Step 3**

Flip the flashlight upside down to remove the old battery. You may need to give the flashlight a hard shake to dislodge the battery. The battery is not connected to anything, but the fit may be tight inside the flashlight tube.

#### **Step 4**

Replace the new battery inside the tube with the "+" end of the battery facing up. The battery will display the "+" sign near the top edge of the battery.

#### **Step 5**

Screw the head back onto the flashlight tube.

#### **Step 6**

Snap or screw on the protective cover. Switch the flashlight to on to ensure the battery is properly installed.

45. What should you do before you replace the new battery?
- A. Screw on the protective cover.
  - B. Remove the cover protecting the lens.
  - C. Unscrew the head that holds the lens.
  - D. Flip the flashlight upside down to remove the old battery.

**Read the following text to answer the question.**

Earthquakes are movements in Earth's crust. The crust is Earth's rocky outer layer, the solid ground that we live on. Earth's crust is broken up into many gigantic sections of rigid rock called plates. The plates slide around slowly on a layer of hot, melted rock deep inside Earth. Sometimes the plates crash together. Sometimes the edge of one plate slides under another plate.

Earthquakes are most common in places where Earth's plates bump against each other. More earthquakes happen in the area around the Pacific Ocean than anywhere else. The plate that makes up the bottom of the Pacific is constantly squeezed by the surrounding plates. The pressure causes earthquakes around the edges of the plate.

The edge of the Pacific plate runs along the western coast of North and South America. Japan, China, eastern Russia, and the countries of Southeast Asia lie on the other edge of the Pacific plate. All of these places have frequent earthquakes.

Most earthquakes are small. The shaking is weak and lasts only a few seconds. You probably would not even notice a weak earthquake. Some earthquakes are very powerful. They cause a lot of shaking. The shaking can last for minutes. Powerful earthquakes destroy buildings, roads, and bridges.

The movement of the ground during an earthquake makes buildings and bridges shake. If the buildings and bridges shake enough, they will fall down. Damaged buildings can catch on fire.

Earthquakes can also cause landslides. The shaking loosens rock and soil on the sides of mountains and hills. The soil and rock slides down. It can bury towns and neighborhoods.

Earthquakes can cause huge waves called tsunamis. Rock slipping along a fault under the ocean causes a tsunami. The sudden movement of the rock sends a shockwave through the water above it. It makes powerful waves of water on the ocean's surface. The waves spread out across the ocean. When the waves reach shallow water near land they get bigger and taller. Tsunami waves can be 50 feet (15 meters) high!

48. What is the benefit of reading the text?
- A. We know how the earthquake occurs.
  - B. We know how the soil and rock slide down.
  - C. We know how the rock slip along a fault under the ocean.
  - D. We know how the plates slide around slowly on a layer of hot.

Earthquakes are movements in Earth's crust. The crust is Earth's rocky outer layer, the solid ground that we live on. Earth's crust is broken up into many gigantic sections of rigid rock called plates. The plates slide around slowly on a layer of hot, melted rock deep inside Earth. Sometimes the plates crash together. Sometimes the edge of one plate slides under another plate.

49. Based on the text we can say that...

- A. earthquakes never cause huge waves called tsunamis.
- B. earthquakes seldom cause landslides around the melted rock
- C. rock slipping along a fault over the ocean causes a tsunami in certain places
- D. the plates slide around slowly on a layer of hot, melted rock deep inside Earth.
